MIDDLE SPOOLS WITH PLAIN BOTTOM

Middle spools are made for trucks build in 2006 and earlier. Sold individually.

The below middle spools come with an additional tapered sleeve measuring 8″ that attaches to the top of the spool. This extra reduced sleeve fits INTO the bottom of any top stack (corresponding to the correct diameter) and offers the kit extra support and strength. For Peterbilt 379: Trucks between 1987-2003, use 52” spool. From 2003-2006, use a 55″ spools. (Some Peterbilt 379 models built in late 2003 may need 52″ spools) Please measure the distance between your current upper and lower exhaust brackets for exact dimensions.

Attention! The below measurements are the length of each spool and do not include the additional tapered sleeve . If assembled correctly, the middle spool will measure either 52″ or 55″ spools.

STANDARD DONALDSON AIR CAN \ PREMIUM DONALDSON AIR CAN

The installation of the top lid is the difference between the standard and premium air cleaner cans.

THE STANDARD AIR CLEANER CAN TOP LID IS MOUNTED BY BOLTS THAT ARE AROUND THE LID.

THE PREMIUM AIR CLEANER CAN HAS A TWIST OFF LID AND IS SECURED WITH BOLTS UNDERNEATH THE LID, OFFERING A CLEAN SLEEK LOOK.
